

Got questions about
scallop medallions?

**We've got
answers.**

Q: What is a Scallop Medallion?

A: Our scallop medallions are made from whole Patagonian sea scallops bound together with a fish gelatin, giving you a larger scallop. They are then formed and cut into larger scallops.

Q: Are they made with chemicals?

A: No, medallions are not made with chemicals. They are crafted with the simple ingredients of scallops (*zygochlamys patagonica*), fish gelatin (cod, haddock, pollock) and salt.

Q: Are True North Scallop Medallions sustainable?

A: Yes! Our scallops are sourced from an MSC certified fishery and are Ocean Wise recommended.

Q: Why are Scallop Medallions so awesome?

A: Scallop medallions are a cost effective, center of plate protein the whole family will love. They are sweet, tender and easy to cook – two minutes on either side, and you've got a perfectly seared scallop for dinner.
